-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

- 6) ☐ Other: \_\_\_\_.

## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to because trademarks and tradenames should not be used. Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3611

3. Claims 1, 2, 5, 6 and 8-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Schutten, US #6,575,297.

4. Schutten discloses an illustrative drug card comprising illustrative portion 32 and visually aided instruction 14. The display is foldable. Illustrative portion 32 includes a pouch for medication (Figure 1). Symbols (AM, PM) indicate when medication is to be administered. Figure 2 shows where symbols regarding what food to administer with the medication may be recorded. Allergies and contact information are also included (Figure 1).

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 4, 7, 12 and 14-21 rejected under 35 U.S.C. 103(a) as being unpatentable over Schutten.

7. Schutten does not specifically teach a picture of the medication, however, this is considered to be an equivalent alternative. It would have been obvious to one of ordinary skill in the art to show a picture of the medication instead of a sample as an alternate way of portraying the medication.

8. Schutten does not particularly teach the symbols or drug interactions as being shown, however, this is considered to be a matter of design choice. It would have been obvious to one of ordinary skill in the art to display whatever information is deemed necessary for the patient. Also, patentable novelty cannot be principally predicated on

mere printed matter and arrangements thereof, but must reside basically in physical structure. The device of Schutten shows a medical information guide. The specific words or symbols used thereon cannot be relied on for patentability.

9. Claims 3, 23-30 and 32-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schutten as applied to claim 1 above, and further in view of Stern, US #4,310,978.

10. Schutten does not teach the card as being magnetic, however, this is well known in the art of cards. Stern teaches an information card including a magnetic layer (Figure 4). It would have been obvious to one of ordinary skill to utilize a magnetic layer in the device of Schutten so that the card may be displayed on a magnetic surface where it may be more easily seen.

11. Claims 13 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schutten as applied to claim 1 above, and further in view of Will, US #4,593,819.

12. Schutten does not teach the use of Braille, however, this is well known in the art. Will teaches a medical chart having Braille thereon (Figure 2). It would have been obvious to one of ordinary skill in the art to utilize Braille on the device of Schutten so that visually impaired patients may use the card.

13. Claims 31 and 40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schutten as applied to claim 1 above, and further in view of Stern and Will.

14. It would have been obvious to one of ordinary skill to utilize Braille on the magnetic card for the same reasons as described above.

### ***Conclusion***

15. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patents 6349491, 5621990, 5487566, 5759043, 5261702, 4972657, 5393100 and 5431450 are cited as of interest.
